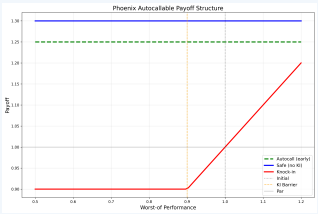
Phoenix Autocallable Note

Visa (V) + Mastercard (MA) Basket



Product Terms	Pricing Results
Maturity: 3 Years	Price: **97.64% of par**
Observations: Quarterly	Autocall Prob: **87.2%**
Autocall Barrier: 100%	Knock-in Prob: **69.5%**
Knock-in Barrier: 90%	Expected Yield: **9.8% p.a.**
Coupon Rate: 10% p.a.	

Investment Thesis

Digital payments remain structurally resilient. V/MA benefit from consumer spending, cross-border growth, and network effects. With moderate volatility (21%) and high correlation (87.5%), this Phoenix structure monetizes sideways-to-bullish price action while providing conditional 10% yield.

Greek	V (Visa)	MA	Interpretation
Delta	0.0030	0.0018	Low directional risk
Gamma	-0.0006	-0.0002	Short convexity
Vega	-0.287	-	Issuer short vol
Corr. Sens.	0.075	-	Long correlation
